

Master of Science in Electrical Engineering

Proposal for Grad Engineering Project, Independent Study, or Directed Study Courses

This course is a faculty supervised project course involving research into methods, systems or procedures which relate to real world situations. The specific project or topic to be undertaken is chosen by the student with the approval of a member of the faculty and is to be appropriate to the program of study of the individual student. The methodology employed in the project is guided by the faculty member.

Student Information

Name: _____ ID #: _____

Address: _____ City: _____

State: _____ Zip Code: _____ Phone: _____

Semester of registration for this course: _____

Type of Course (project, directed study, or independent study): _____

Faculty Advisor: _____

Description of Proposed Project:

Description of Planned Research Methodology:
